

# Stainless steel inner-rings for ASFA-L worm-drive hose clips

**W4**

**Black finish**

## Inner Rings for ASFA L clips W4

### Information

This inner ring for ASFA-L worm-drive clip was designed to give extra protection to the hose, especially in applications where changes in the frequency of vibration can be an issue. The ring also contributes to an even distribution of pressure around the hose and confers a constant tension function to the clip. The black coating helps to ensure that the rings adapts correctly to the hose assembly.

Ø Application mm	Reference Black	Reference Plain	a ±0,5	b	Box Quantity	Packing
8-16	73031015	03031018	13,5	0,25	200	1000
